Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

ILED ACTION

Current Status

1. This action is responsive to Applicants' amendment of 26 June 2008.
2. Receipt and entry of Applicants' amendment is acknowledged.
3. Claims 31-45 and 68 are pending in the application.

The 112 rejection in the previous Office Action dated 03/07/2008 has been withdrawn in favor of this rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 31-45 and 68 are rejected under 35 U.S.C. 102(e) as being anticipated by Schacht et al., {US 2004/0081683}.

Schacht et al. disclose a transdermal delivery system wherein the compound is fesoterodine. The Transdermal Delivery System (TDS) comprises of a backing layer inert to the components of the matrix, a selfadhesive matrix containing an amine-functional drug (fesoterodine) and a protective foil or sheet to be removed prior to use, characterized in that the self-adhesive matrix consists of a solid or semi-solid semi-permeable polymer (1) wherein an amine functional drug in its free base form has been

incorporated, (2) which is saturated with the amine functional drug and contains said drug as a multitude of microreservoirs within the matrix, (3) which is highly permeable for the free base of the amine functional drug, (4) which is impermeable for the protonated form of the amine functional drug, (5) wherein the maximum diameter of the microreservoirs is less than the thickness of the matrix. Said TDS provides for enhanced flux of the amine functional drug across the TDS/skin interface. This reads on Applicants claim device for transdermal delivery comprising fesoterodine. See the transdermal delivery system on page 2, sections 0034 and 0035 of US 2004/0081683, abstract and claims.
